Dear Mr. Meyer:

Re: Evaluation of Waste Solids

This is in response to your letter dated February 21, 1986. Staff has reviewed the information supplied and has determined that it is inadequate for evaluation of the waste. Before this evaluation may be completed, a thorough description of each solid waste and the process generating each waste must be supplied to this office.

Analytical information which addresses all of the parameters outlined in the "Foundry Waste Disposal Guideline, November 12, 1985," along with all of the Quality Assurance/Quality Control information requested in Attachment I of the above document, must be supplied to this office before a proper evaluation may be completed. A minimum of three separate samples of each waste should be analyzed.

If the information supplied with your letter is proven to be true of all of the solid wastes which you wish to dispose in the proposed alternate site, then a Type I site will be required (based on total sulfide).

If you have any questions, please contact Mr. Lewis R. Schoenberger of the Solid Waste Management Branch at AC 317/243-5035.

Very truly yours,

*George Oliver*
